

Khaled I. Sabarna, Ph.D

Email: k.sabarna@paluniv.edu.ps

Dr. Khaled Sabarna is a holder of a Ph.D in Biotechnology/ Biochemistry from Martin Luther University-(IPB) in Germany since 2007. Dr. Sabarna is the Dean of Allied Medical Sciences faculty at Palestine Ahliya University (PAU) with a research interests on the molecular characterization and further in vitro biochemical analysis living models. Recently focuses up to date techniques and Medical Imaging and Radiology. Dr. Sabarna has a decent record of publications targeting the above-mentioned fields.

Overall Competencies:

Dr. Sabarna has a solid background in molecular cell biology, molecular characterization, and further in vitro biochemical analysis: specific to Construction of cDNA, sub cloning of isolated genes, growing cultures, isolating, biological assays, including growth curves and survival assays. He has also investigated protein over –express and purification as one of the proteins that were identified by the two-hybrid genetic screen, sequenced and cloned in a bacterial host vector.

Distinguished experience in managing and establishing academic departments in scientific colleges that suit the Palestinian labour market.
